

Steelhead Mobile Solution

Riverbed® extends the benefits of its award-winning WAN optimization technology to any individual PC, including mobile workers, temporary locations, and very small offices.

Riverbed's Steelhead Mobile provide mobile workers LAN-like access to corporate files and applications no matter where they are, anywhere in the world. With a simple software package installed transparently on their laptops or desktops, Steelhead Mobile extends virtually the same functionality found in Riverbed's award-winning Steelhead appliances to mobile workers everywhere.

How It Works

Steelhead Mobile works by interacting directly with any Steelhead appliance to optimize applications the same way in which two Steelhead devices would work together, the effect is like putting a Steelhead appliance directly on the users laptop. Steelhead Mobile utilizes the Steelhead Mobile Controllers (SMC) to manage the Steelhead Mobile Licenses and controls the deployment, management, and reporting of the Steelhead Mobile software clients. Organizations from small-to-mid-size businesses (SMBs) to the largest global corporations can take advantages of these features to deploy cost effective mobile WAN optimization solutions to deliver performance improvements up to 100x.

For mobile workers, this means they can be productive again. They can collaborate with co-workers in real time. Design documents, Excel files, or even large email attachments can be sent at blazing speeds around the world. Being on the road in no longer a barrier to getting their jobs done.

Product Datasheet

Riverbed's Steelhead Mobile delivers leading-edge application acceleration to mobile workers wherever they connect to the network.

Providing support for the broad range of applications that enterprises use the most, Steelhead Mobile enables remote workers to collaborate and access applications as if they were in the office.

Steelhead Mobile helps eliminate performance problems caused by bandwidth constraints, latency, or application protocol inefficiencies, resulting in enhanced user productivity and satisfaction.

With Steelhead Mobile, data moves faster, applications perform seamlessly, and remote workers are no longer "remote".

Product Datasheet

System Requirements: Steelhead Mobile

Operating System	Windows 2000 SP4, XP SP2 (32 bit versions only), Vista (32 bit and 64 bit versions), Windows 7 (32 bit and 64 bit versions) Mac OSX 10.5 and 10.6 (Intel only)
CPU	Celeron 650 MHz
Memory	256 MB
Steelhead Appliance ¹	Required
Steelhead Mobile Controller (SMC)	Required: Either Steelhead Mobile Controller Appliance or Steelhead Mobile Controller Virtual Edition

Software Specifications: Steelhead Mobile

Concurrent Clients Supported per SMC	4,000 (SMC-Appliance) / 100 (SMC-Virtual Edition)
Concurrent Clients Supported with SMC Cluster	n x 4,000
VPN Compatibility	Cisco, Juniper, Nortel, OpenVPN, Microsoft, Aventail, Citrix, AT&T Netclient, Array, Checkpoint, F5, Sonicwall, Fortinet, WatchGuard
Wireless PC Compatibility	Verizon, AT&T, Sprint
